Subsequent unpaid tolls may also result in additional fees, referral to collections and/or the issuance of a Uniform Traffic Citation for each unpaid toll.

Subject: **Hydrologic and Hydraulic Analysis for Tributary Units 8, 10, and 15 in Nassau County, Florida**

Dear Mr. Wild:

I appreciate this opportunity to provide our proposal in connection with your proposed development of Tributary Units 8, 10, and 15 located in Nassau County, Florida. Gemini has previously submitted and received a Conditional Letter of Map Revision (CLOMR) for Phase 1, and a follow-up Letter of Map Revision (LOMR) for portions of Phase 1 is now pending approval. For this current effort, Gemini Engineering & Sciences will be providing you services related to hydrologic and hydraulic modeling of Units 8, 10, and 15 of the Tributary development, essentially expanding the previous analysis that was performed. Detailed descriptions of our services are listed below.

Requirements and Scope of Services

1. We will need the following items:

    a. Available topographic survey of the site and adjacent areas.
    b. CAD file of the proposed site layout, including proposed on-site drainage divides.
    c. 1 PDF file of the complete site plans.
    d. 1 PDF of the stormwater calculations.
    e. ICPR model of the stormwater calculations.
    f. No field surveys are planned as part of this proposal, but there may still be a need for additional surveys (assuming as-built data is not available, which we will research). Additional surveys could be of culverts or other drainage structures, or natural cross-sections. We cannot rule out the need for other surveys until our initial assessment is complete.

2. Using the Phase 1 modeling previously developed by our firm, we will expand the model coverage to include the undeveloped lands planned to be developed as part of Units 8, 10, and 15. We will modify the GIS model data, develop updated hydrologic and hydraulic parameterization, and simulate the 25- and 100-year 24-hour storm events for pre-project conditions.

3. Using the available plans for Units 8, 10, and 15, we will modify the expanded existing conditions model from Task 2 to reflect post-project conditions. We will modify the GIS model features to match the proposed conditions, and we will simulate the 25- and 100-year 24-hour storm events. We will provide these modeling results to you prior to proceeding. The proposed conditions analysis includes modeling support of the major culvert crossings associated with Units 8, 10, and 15.

4. Assuming the modeling results are acceptable, we will delineate the proposed conditions floodplain using a combination of the topographic survey, County lidar data, and your site plans. We will tie the proposed mapping to the effective mapping and the mapping from Phase 1, to within the FEMA-allowed 0.5-foot elevation tolerance. The mapping will include the necessary BFEs, zone breaks, and profile baseline.

OPTIONAL TASKS

5. We will prepare a technical memorandum describing the assumption, methodology, and results used in our hydrologic and hydraulic analysis. We will include necessary figures to explain our efforts. We will provide a certified PDF of the memorandum.

6. Assuming the modeling and mapping results are acceptable, and with your authorization, a CLOMR application will be developed to reflect the proposed changes to the floodplain due to the development. We will prepare the necessary forms, figures, documentation, and certifications for a CLOMR submittal to the County and FEMA. **Please note that a CLOMR submittal also requires proof of compliance with the Endangered Species Act (ESA).** We will need assistance from your environmental specialist to develop this documentation. We will submit the CLOMR to the County and FEMA, and answer questions from the reviewers concerning the data submitted to support our case. We will keep you updated on the status of the CLOMR review until a determination is made.

Please note the following:

- With any CLOMR submittal, due process requirements will be necessary. This mainly involves the notification to property owners that portions of their land have been affected by the pending CLOMR. Gemini will be handling the notifications with the assistance from you in possibly obtaining the contact information for the affected property owners.

- Please note that the resulting CLOMR approval does not officially change a flood zone. The CLOMR must be followed up with a follow-up LOMR (based on as-built surveys) for the zone change to become effective. A follow-up LOMR is not included in this proposal due to the uncertainty of when/if such a submittal can be made.

Fee Schedule and Timeline

Once we receive all the necessary items, our timeline is as follows:

Tasks 1-2 (Existing Conditions Modeling) --------- 3-4 weeks
Task 3 (Proposed Conditions Modeling) ---------- 4-5 weeks
Task 4 (Mapping) ---------- 1 week

OPTIONAL TASKS
Task 5 (Memo) ---------- 2 weeks
Task 6 (CLOMR) ---------- 2 weeks for preparation and submittal

Please note that the FEMA review time frame has historically taken 6-8 months for a CLOMR determination.

Our fee schedule (lump sum) is as follows:

Tasks 1-2 (Existing Conditions Modeling) --------- $4,200
Task 3 (Proposed Conditions Modeling) ---------- $8,900
Task 4 (Mapping) ---------- $1,800

OPTIONAL TASKS
Task 5 (Memo) ---------- $2,100
Task 6 (CLOMR) ---------- $10,000

Late payments are subject to a 1.5% per month interest charge. Please note that the above costs do not include any review fees or survey costs. **At this time, FEMA requires a review fee of $6,500 for a CLOMR.**

Closing

I appreciate this opportunity to submit my proposal to you and hope that you will find it satisfactory. Please see the attached ***EXHIBIT A*** for additional provisions. This proposal shall remain open for thirty (30) days. If you find our proposal acceptable, an executed copy of this letter may serve as our agreement.

If you have any questions, please do not hesitate to contact me.

Sincerely,

Gemini Engineering & Sciences, Inc.

WHEREAS, the Association and the District have a mutual obligation to the District's property owners and residents to provide for the proper and efficient operation and maintenance of the District Property, and the parties accordingly agree that this mutual obligation is sufficient consideration to induce the other party to enter into this Agreement.

NOW, THEREFORE, in consideration of the recitals, agreements, and mutual covenants contained herein, and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged by the parties, the parties agree as follows:

The Association shall specifically indemnify the District for any penalties, judgments, or orders levied or imposed against the District for failure to comply with any governmental permits, rules, regulations, requirements, and orders during the term of this Agreement, except to the extent any such failure to comply and resulting penalties, judgments or orders levied or imposed against the District are caused by the failure of the District, after receipt of notice from the Association, to timely take any action necessary to comply or allow Association to comply.

G. *Adherence to District Rules, Regulations and Policies.* The Association's personnel shall be familiar with all District policies and procedures and shall ensure that all persons using the District Property, including maintenance and repair contractors, are informed with respect to the rules, regulations and notices as may be promulgated by the District from time to time, and ensure that said persons conform therewith. I. *Staffing and Billing.* The Association shall be solely responsible for the staffing, budgeting, financing, billing and collection of fees, assessments, service charges, etc., necessary to perform the management, operation, and oversight responsibilities set forth in this Agreement.

J. *Liens and Claims.* The Association shall promptly and properly pay for all contractors retained, labor employed, materials purchased, and equipment hired by it to perform under this Agreement. K. *Limitations on Association's Duties.* Notwithstanding anything contained herein to the contrary: The Association shall not be responsible for or have control of accounting or cash disbursements for the District, nor shall the Association have the authority to approve change orders or enter into new agreements on behalf of the District.

L. *Scope of the District Property.* The District and the Association intend for the District Property described on **Exhibit A** to be inclusive of all CDD-owned and/or maintained property and improvements. Both parties understand that the extent of the District Property subject to this Agreement will expand with time and that the intent is that the Association's obligations under this Agreement shall apply to newly-added property and improvements without further amendment of this Agreement. The District and the Association agree to work cooperatively to ensure that both parties agree on the specific property and improvements subject to this Agreement.

SECTION 3. COMPENSATION. The District shall pay the Association the sum of Ten Dollars ($10.00) per year for the provision of management, operation, and contractual oversight services pursuant to the terms of this Agreement. Providing for Conflicts, Severability, and an Effective Date

Mr. Haber stated that Resolution 2021-12 was similar to the prior Master Assessment Resolution, where the maximum lien was levied across the entire District, which allowed the CDD to issue bonds and levy assessments through Supplemental Assessment Reports and Supplemental Assessment Resolutions. Resolution 2021-12 accomplishes the following:

- Identifies the project.
- Makes certain findings as it relates to the project being in the best interest of the community.
- Makes certain findings about the financing of the project through the issuance of the bonds secured by assessments being in the best interest of the community.
- Provides provisions, namely to the True-Up provision and governmental transfers.
- Sets forth the terms of the bonds
- Includes the Engineer's Report, which describes the specific project identified for these bonds, and the Methodology Report, which describes the manner in which the assessments will be allocated.

Mr. Wrathell presented an updated version of the Supplemental Special Assessment Methodology Report for the Series 2021B bonds, which differed from the version in the agenda package, and noted that minor textural changes were made. He highlighted the following:

- The Series 2019 and 2021 bonds financed the construction of the Phase 1A project, Units 1-7.
- This 2021B bond issuance will finance the construction of the Phase 1B project, comprised of Units 8, 10, 12, 14 and 15, totaling 722 residential units, as outlined in the Capital Improvement Plan (CIP) section of the Engineer's Report.
- The Master Improvement cost is $16,487,000.
- The Series 2021B principal amount of bonds is $10 million, of which approximately $8.596 million will fund the construction of the Phase 1B project and the balance of approximately $7.45 million, will be funded either by future bonds or the Developer.

- The Series 2021B bonds would have a 13½ year interest only period with the final maturity. As such, at the time of the lot closing, the principal and interest that is accrued will be paid down at the next call date; a 14 month capitalize interest period is included.
